

Improved speed band in km/h in rFMS.

DOITS working group have proposed to ACEA HDEI FMS Standardisation Group to, in the new version of rFMS 2,0, make speed profile bands to better capture critical speed intervals.

HDEI FMS Standardisation Group initial agreement for rFMS 2,0 (km/h).

DOITS Proposal

Speed profile band preferable in even steps e.g 0-4 that increase granularity and also captures critical speed intervals like 80-84; 84-88 km/h

HDEI FMS Standardisation Group's mandatory version (km/h)

DOITS proposal was forwarded to HDEI FMS Standardisation Group and based on this the **final decision** taken for rFMS 2,0 is:

0, 4]] 4, 8]] 8, 12]] 12, 16]] 16, 20]] 20, 24]] ...] 156, 160]] 160,]
